MANN BROTHERS METALLIC COLORS

Water-Based 100% Acrylic Latex

Mann Brothers Metallic comes in a range of colors and effects and can bring the most creative designs to life. Easily intermix and layer different colors to widen the color range and achieve special effects such as pearlescent, metallic, or transparent shimmers. Mann Brothers Metallic lines are perfect for light industrial and theming applications where outdoor durability and easy maintenance is essential.

MB93 Pearlite Interior grades provide an economical option to achieve the metallic appearance for all indoor projects.

MB90 Pearlite Exterior grades are formulated to last for years by using both UV Absorbing technology and exterior-grade metallic pigments.

MB94 MetallLux is made using real metal flakes.

MB95 MetallLux Patina is made using real metal flakes such as iron and copper that can react to create special effects such as patina and rust.
